Douglas Vinicius Dierings

PROGRAMMER

OBJECTIVE

As a dedicated student at CCT College Dublin and an enthusiastic freelancer programmer, I am driven by a deep passion for technology. With a primary focus on the Java language, I have honed my skills and expertise in this domain. However, my thirst for knowledge and growth motivates me to explore and embrace new technologies continuously.

WORK EXPERIENCE

Freelancer, Dublin
September 2022 - Current

Project: Purchasing system (Project Link)

- The program is designed to provide a seamless shopping experience in-store. It allows customers to browse through available items, select desired quantities, and conveniently add or remove items from their virtual shopping bag. The program incorporates a MySQL Database to track inventory levels, ensuring accurate stock management.
- Technologies: Java and MySQL

Freelancer, Dublin
April 2023 – June 2023

Project: Grade Average Calculator (Project Link)

- The project is a Java application developed using the Java Swing library, providing a simple and user-friendly graphical interface to calculate weighted average grades. The program allows users to input the grades and weights of evaluations for a specific subject, and based on this data, it performs the calculation of the final average.
- Technologies: Java and Java Swing
